

RUTUJA NALAWADE

DATA ENGINEER | DATA ANALYST

Pune, Maharashtra | +91-9766176467 | rutujaknalawade@gmail.com

Profile Summary

- **Data Engineering & Data Analytics Intern** with 1+ year of hands-on, project-based experience building cloud ETL pipelines on AWS alongside senior engineers, from raw ingestion through to analytics-ready reporting.
- **Practical exposure to the AWS data stack** — S3, Glue, EMR, Lambda, Step Functions, Athena, Redshift, DynamoDB, RDS, and EC2 — built through real internship pipeline tasks rather than isolated tutorials.
- **Experience with event-driven ingestion patterns** (Kinesis Data Streams, Kafka/MSK, SQS, SNS) and growing proficiency in PySpark, Python, and SQL for data cleansing and transformation.
- **Early-stage understanding of dimensional modeling** (Star Schema, Fact & Dimension tables) and Redshift tuning, plus hands-on involvement in data-quality checks, deduplication, and orchestration shadowing (Step Functions, Airflow, EventBridge).
- **Dependable Agile/Scrum contributor** who partnered with Business Analysts, Data Analysts, and QA on sprint deliverables, and is now seeking a full-time Data Engineer role to build on this internship foundation.

Technical Skills

Languages & AWS Core:

- Languages: PySpark, Python, SQL, Bash
- Storage & Compute: S3, DynamoDB, RDS, EC2, EMR
- Data Ingestion: Kinesis Data Streams, Apache Kafka (MSK), SQS, SNS

Data Modeling & Big Data:

- Dimensional Modeling: Star Schema, Fact & Dimension Tables
- Redshift Sort & Distribution Keys, ETL/ELT, Batch & Incremental Loads
- Big Data Frameworks: Apache Spark, Hadoop
- Databases & Reporting: Amazon Redshift, MySQL, Excel, Power BI

Processing & Governance (AWS):

- Processing & Orchestration: Glue, Glue Crawlers, Glue Data Catalog, Lambda, Step Functions, Airflow, EventBridge
- Governance & Security: Athena, Redshift, IAM, AWS Secrets Manager, CloudWatch

Core Strengths (Internship-Built):

- ETL Pipeline Assistance & Data Lake Zoning (Raw/Processed)
- Data Validation, Deduplication & Standardization
- Workflow Automation Exposure (Airflow, Step Functions)
- Agile/Scrum Delivery & Cross-Functional Collaboration

Soft Skills

Fast Learner • Team Collaborator • Analytical Thinker • Detail-Oriented • Clear Communicator • Problem Solver

Professional Experience

Data Engineering Intern Code Icons Technology

Apr 2025 to May 2026
Pune, India

- **Pipeline Engineering:** Built and maintained ETL jobs in AWS Glue and PySpark under senior engineer supervision, converting raw property-listing datasets into clean, query-ready tables.
- **Data Lake Structuring:** Organized S3 storage into Raw and Processed layers, applying the partitioning and naming standards set by the senior engineering team.
- **Event-Driven Pipeline Exposure:** Explored streaming fundamentals with Kinesis Data Streams, Kafka (MSK), SQS, and SNS through mentor-led exercises to understand near real-time ingestion.
- **Automation & Compute:** Developed introductory AWS Lambda functions and used EC2 for lightweight validation jobs, with each script reviewed by senior engineers.
- **Query & Orchestration Support:** Wrote SQL queries in Athena and Redshift for dashboard reporting, and assisted with Step Functions, EventBridge, and Airflow DAG configuration.
- **Data Quality & Security:** Ran manual and scripted validation/deduplication routines under guidance, and set up basic IAM roles and Secrets Manager entries for secure access.
- **Scrum Participation:** Took part in daily stand-ups, sprint planning, and retrospectives, delivering assigned pipeline tasks alongside senior Data Engineers.

Full Stack Java Intern Sanyu Infotech Ltd

Dec 2024 to Jan 2025
Pune, India

- **Cross-Stack Exposure:** Assisted on full-stack development tasks (Java, Spring Boot, React) to build an understanding of how backend data feeds downstream applications.
- **Database Support:** Queried and maintained MySQL tables and helped integrate REST APIs, strengthening fundamentals in relational data handling.
- **Tooling & Collaboration:** Used Git for version control and Postman for API validation, coordinating closely with developers across the project lifecycle.

Education

Bachelor of Engineering: Computer Science & Engineering (SPPU)
RMD Sinhgad School of Engineering, Warje, Pune

Sep 2023 – Jun 2026
CGPA: 9.64 / 10
